

## 2022 M.D. of Smoky River No. 130 Seedling Order Form

<b>Name:</b>	
<b>Mailing address</b>	
<b>Phone #'s</b>	
<b><u>PLEASE</u> provide e-mail</b>	

**Orders will be accepted until March 18<sup>th</sup>, 2022, many species have limited availability, when the limited quantities are spoken for a waiting list will be created – but no guarantees. Minimum order is one bundle (10 or 15 seedlings), and orders need to be per bundle. i.e. 4 bundles White spruce and 3 Siberian larch (for a total of 60 spruce and 30 larch)**

**We reserve the right to substitute species (ie. Lilac may be either Common lilac or Vilosa lilac)**

**Seedlings must be pre-paid, and will be FOB the M.D. of Smoky River yard in Falher, Alberta  
Seedling trees will be available at the end of May 2022.**

Species	Seedlings per bundle	# of bundles	Cost per bundle	(# bundles X cost per)	Initial quantity of seedlings
White spruce	15		\$4.00		1000
Lodgepole pine	15		\$4.00		1000
Blue spruce	10		\$3.00		500
Hybrid Blue/white	10		\$3.00		500
Lilac	10		\$3.00		750
Siberian larch	10		\$3.00		750
Manitoba maple	10		\$3.00		100
Golden willow	10		\$6.00		200
Hybrid poplar	10		\$6.00		250
Silver buffaloberry	10		\$10.00		150
Hemp mats & nails	10		\$10.00		1800
Wood nails	10		\$1.50		500

\_\_\_\_\_  
M.D. representative signature

**Paid, receipt no.** \_\_\_\_\_

**Posted to spreadsheet** \_\_\_\_\_

## **PLANTING RESTRICTIONS – PER M.D. of Smoky River Policy**

Information on tree plantings given to M.D. of Smoky River landowners will include the following recommendations:

Plantings along the roadside must be at least 30 m from the property line or 40 m from the middle of the road (unless otherwise approved).

Plantings perpendicular to the road must be at least 15 m from the property line. Plantings are not to disturb sightlines at intersections for a minimum of 50 metres in all directions.

If a powerline is close to your planting area, you must stay 15 m away from it if you have trees that will grow in excess of 13 m in height. You may plant shorter shrubs (e.g. dogwood, lilac, etc.) nearer the lines.

Landowners should consider the size of their largest implement (and future implements) when planning the layout of the shelterbelt. Make sure that you will have enough room to move equipment freely when the trees are fully grown.

Exceptions to planting restrictions may be approved by Council on an individual basis. Form M must be completed, signed and approved.

### **Cautions for Town and Urban plantings especially:**

These trees will provide beauty and fantastic shade some day, but be sure to plant them where you'll be grateful to have year round shade. Lodgepole pine, White & Blue spruce, Siberian larch should be planted 12 to 15' apart. The willow, poplar and ash should be planted 10' or so apart.

When choosing planting sites keep in mind that these tiny seedlings could grow to become massive trees, Spruce, pine & larch have the potential to grow to 60' in height, 20' in diameter with roots that may extend twice as far as their height. Don't plant these seedlings close to current or future building sites as the roots can ruin foundations and basements.

Keep them away from sidewalks, driveways and boulevards where the branches might pose issues and require trimming. Keep them away from overhead power and phone lines, and don't forget what's underground either, in 15 years will they have to be destroyed because they are ruining the sewer system, or because the gas or water line needs repair?
